2022

Chip-8 Emulator - C++, Architecture, SDL

2022

Tetris Clone - SDL, C++

2018

Conway's Game of Life - C++

2015

CAREER OBJECTIVE

I am aiming to combine my lifelong interest of computation and a professional environment. I have always been captivated by problems that arise during my time developing software, and I have developed relevant skills as a result. A position at your company where I contribute to an existing code base, and/or where I build things from the ground up peaks my interest.

EXPERIENCE

Instructor at GenTechSupport

January 2024 - Present

Teaching kids STEM.

Internship at Canned Goods

December - January 2024

Automated online shipping with restful API calls from Python.

Deployed the project on a Linux server where it currently runs.

CERTIFICATIONS - AWARDS

Comp TIA Project + — Project Management

2023

ITIL 4 — Service Management

2023

Eagle Scout Award, BSA

2017

Hack Phoenix 2013, 2nd place

2013
